PROFESSIONAL SUMMARY

I have over one year of experience in software development. During this time, I have gained a strong understanding of programming fundamentals, problem-solving techniques, and the principles of clean code. I have also learned and worked with Dart and Flutter, building skills in mobile app development and creating efficient, user-friendly applications.

WORK EXPERIENCE

Flutter Developer (Personal & Team Projects)

Oct 2025 – Present

BarBros (Team Project - Ongoing)

- Search barbershops and order there are recognizing serves and seeing tables .
- Implemented BLoC for state management and followed Clean Architecture principles to ensure scalability and clean code.
- **Backend:** Currently under development — implementing authentication, data management, and API services.
- **Link:** <https://github.com/5E-TECH>
- Designed a modern, responsive, and user-friendly interface for browsing products, managing the cart, and completing purchases.

Football Video App (Ongoing)

- Created a video streaming app where users can **watch football videos** and **add comments**.
- The app features content from one of Uzbekistan's top commentators, **Xayrulla Hamidov**.
- Used **video_player**, **Provider**, **Firebase**, and **Dio**, applying the **MVVM** architecture pattern for efficient app structure.
- **Backend:** Currently under development — implementing authentication, data management, and API services.

Nasiya app for shops (Team Project – Ongoing)

- This app helps who want to manage your business, also basic who is working sale on credit
- Implementing **Clean Architecture**, **BLoC** for state management, and **Dio** for API integration.
- Contributing to UI design, architecture setup, and feature development in an agile environment.
